

## GET THE "VET"

Don't doctor your horse, when you don't know how.  
Or try your crude knowledge on sheep, hog or cow.  
You will fail every time in effecting a cure,  
While sickness and pain the beast will endure.

Don't doctor your horse, as some other man said,  
And keep up the treatment until he is half dead;  
Then finding that no good results you can get,  
You have to call in the experienced "VET."

Don't doctor your horse until he's gone past all hope,  
From the evil effects of injurious dope,  
The neighbors may tell you of cases they've known,  
But your horse will soon travel to his last home.

In a case too far gone, the "VET" can not save,  
Or raise up an animal half in the grave.  
But sent for in time, his experience and skill  
Saves an animal sick that your efforts would kill.

Don't kick on the "VET" if you get him too late.  
No science or skill new life can create;  
Don't curse the "doc" if his efforts may fail;  
In disease gone too far, no methods avail.

In veterinary science, as in medical line,  
Disease must be treated at earliest time;  
When sickness has reached the last, fatal stage,  
If the doctor don't cure, don't get in a rage.

DR. CHADWICK, Ada, I. T.

## WILL FURNISH COMPLAINTS

### The Attorney General to Supply What Convention Has Sought

Guthrie, Okla., July 8.—Several days ago W. A. Ledbetter of Ardmore, member of the constitutional convention's advisory committee, received a letter from Attorney General Bonaparte, advising him that he would furnish the committee with a copy of objections and criticisms filed against the proposed constitution by its opponents. The notice is in keeping with Mr. Bonaparte's promise to the convention deputation which was in Washington some time ago, under which the convention is to be given an opportunity to defend its position on any matter complained of.

#### JOHN D. SHOULD GO TO JAIL.

#### William J. Bryan Says This Would Be Soulution of the Trust Problem.

Chicago, Ill., July 7.—A dispatch to the Record-Herald from Warsaw, Indiana, says:

Send John D. Rockefeller and a dozen other trust magnates to prison for a long term of years, and one of the most vital questions before the people of this country will have been solved, declared W. J. Bryan yesterday at a banquet given in his honor by Dr. Sol C. Dickey, president of Winona Lake assembly.

President Roosevelt and others are now bringing to a successful issue the principles and ideas I advocated 17 years ago, Mr. Bryan continued. This is particularly true as regards the tariff. The president is compiling my future speeches for me.

Mr. Bryan took a fling at the president's cabinet, saying there was not a man in it who agreed with Roosevelt. Referring to the controversy between the United States and Japan, Mr. Bryan, who during his trip around the

world visited the eastern empire, said a little more backbone at Washington would settle the differences for all time to come and without a war between the nations.

Mr. Ledbetter telegraphed the attorney general asking that the objections be placed at the conventions disposal prior to its convening July 10, and the law office has signified its intention of forwarding the matter as soon as possible. Mr. Bonaparte advises the forwarding of the complaints must in no wise be construed as an opinion of the department or himself.

Japan will follow in the path of Spain and other nations once powerful unless there is a religious awakening in that country, he said. There's one thing that can save Japan, and that is the spread of Christianity.

#### AN ARTESIAN WELL.

#### L.H. Woodward Has Remarkable Water Supply in His Yard on 9th Street.

Not many of the people of Ada are aware of the fact that there is a flowing well of mineral water at L. H. Woodward's home on 9th street, this city. This is a fact, nevertheless. The well is 70 feet deep, and flows continuously out at the top. It is thought the water has properties of sulphur, magnesia and soda. It is cold and by those who use it is considered very healthful. This well furnishes several families in that part of town and they consider it very valuable.

## STRUCK A VEIN OF COAL

### Such Was the Find During the Drilling a Mile Northeast of Town

Ada has coal. A vein three feet in thickness was punctured by the drill in the oil and gas well at a depth of 365 feet last week. It is a good quality of soft coal. It would be difficult, however, to develop it on account

of the depth, so we will go on down and get oil and gas, and they will, of their own force, come upward to the surface through the oceans of water and other obstacles to the development of the coal beds. You can't keep a coming city down.

## FRISCO PRESIDENT HERE

### President Davidson and Party visit Ada's Cement Plant

A special of five Pullmans arrived here Saturday at 3:51, bearing President A. J. Davidson, Second Vice President C. R. Gray, Third Vice President W. B. Biddle, Freight Traffic Manager J. A. Middleton, and General Passenger Agent A. Hilton, of the Frisco railroad. The party was here to interview the Oklahoma cement people and paid an hour's visit to the plant.

Mr. Beck and Mr. Whittaker showed them through the buildings, and after they had taken in the institution they expressed themselves as agreeably surprised at the size and equipment. The Frisco intends to handle the output of this factory, which at the beginning will be ten cars daily. A few months later the output will be doubled.

The party of railroad officials were through the business section of the city and expressed surprise at the size of the city and at its marvelous growth. Agent McNair did his part well in showing them they were visiting the best city on their line. The special train left for the south at 5:10. Ada was the only stop made by them between Sapulpa and Denison.

## OVER SEA OF PURE WATER

### Driller Brodine Says There Are Just Oceans of Water Under the Soil of Ada, at Three Depths.

"I understand that this city has paid nearly \$40,000 for a reservoir, when as much water and a better quality can be had at a very shallow depth."

This is the statement of Driller Bodine, who is now sinking the oil and gas well near town. He says at 85 feet they struck a magnificent pool of water and again at 285 feet they began striking stratas of sand every 15 feet which contained oceans of pure, soft water.

The well is now 435 feet in depth, and water stands within a few feet of the top. Mr. Bodine says that their bucket, which has a capacity of a barrel and a half, lowered every half minute, will not lower it more than 40 feet. He says that he drilled all over the country and that he has never found at any place as much water as is evident here.

The Frisco people need no longer refuse to move the division to Ada on account of a limited amount of water. We have enough to float the whole Frisco.

#### DOLLIVER DENIES THE RUMOR.

#### Says Duel Story Is Fake—He Has Not Seen Tillman Since March 4.

Chicago, Ill., July 7.—In regard to dispatches from Jackson, Mich., about an alleged altercation between Senators Tillman and Dolliver, Senator Dolliver said today:

"There is not a shred of truth in the story of the altercation. Senator Tillman spoke at Jackson, Mich., July 3, and left the same day for Louisville. I made a Fourth of July speech there the next day and left for Chicago early July 5. I have not seen or spoken to Senator Tillman since March 4."

Senator Tillman has also denied the story.

## LOCATES STANDARD OF INDIANA

### Judge Landis of Chicago Locates the Stock of the Standard of Indiana. Oil King is Willing Witness.

#### What Judge Landis Learned.

That the Standard Oil company of New Jersey owns the Standard Oil company of Indiana and the Union Tank line.

That Standard Oil dividends have averaged forty per cent on a capitalization of about \$100,000,000 during 1903, 1904 and 1905.

That John D. Rockefeller, president of the Standard Oil company, has not been active in its affairs for ten years; has not entered the home office at 26 Broadway, during that period, and that he is a willing but unprofitable witness.

Chicago, Ill., July 7.—John D. Rockefeller, president of the Standard Oil company of New Jersey, and reputed to be the richest man in the world, occupied the witness stand in the United States court yesterday while Judge Landis plied him with questions regarding the financial strength of the company and the business methods of which he is the head.

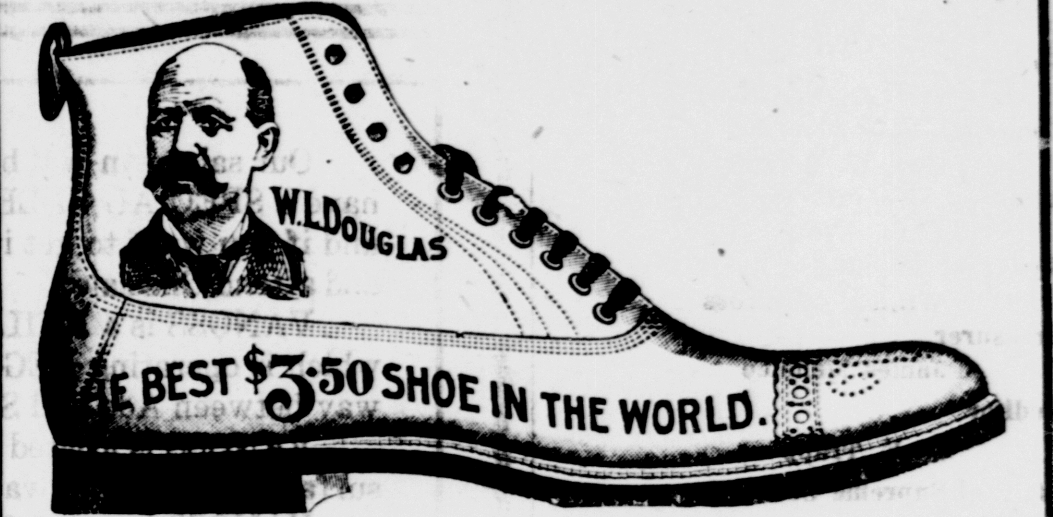

Rockefeller is a very willing and a very unsatisfactory witness. He was ready to tell all he knew, but he said he knew practically nothing. The net result of his examination was that he believed that during the years 1903, 1904 and 1905, the period covering the indictments on which the Standard Oil company of Indiana was recently convicted, the net profits of the Standard Oil company of New Jersey were approximately 40 per cent of a capitalization of \$100,000,000.

The investigation held by Judge Landis today was for the express purpose of determining whether or not the Standard Oil company of Indiana, recently convicted of violation of the law, is really owned by the Standard Oil company of New Jersey; whether the Union Tank line, whose cars were used in the shipments made in violation of law was similarly owned, and also to obtain an idea of the financial resources of the convicted corporation, in order to inflict a fine proportionate to the offense and the assets of the convicted company.

There is only one regret about growing old—one is likely to forget that he ever was a boy.

If you can't pay as you go, stay.

## I. HARRIS

## TO DEMONSTRATE STRENGTH

### Capacity of Navy to be Shown by Voyage to Pacific--War Talk

Oyster Bay, N. Y., July 7.—The significance of Rear Admiral Brownson's addition to the somewhat meager information which has come from President Roosevelt regarding the contemplated two-ocean maneuver of the Atlantic battleship fleet is regarded here as having been overlooked in comment, expert and otherwise, which has since been indulged in on both continents.

Admiral Brownson came to Oyster Bay Friday to take lunch with the president, professing entire ignorance of the maneuver plans. When he left Sagamore Hill for the train for Washington, the admiral had one thought which he wished emphasized—that it was desirable and important to demonstrate to the world how quickly the American navy could transfer its fighting strength from one ocean to the other.

This was distinctly an addition to the president's previous statement, issued through Secretary Loeb, wherein the object of the maneuvers was said to be an exercise movement for the benefit of the navy to perfect its training in fleet exercise on an extended scale, the purpose and effect of the plan being for the benefit of the navy alone.

What came from President Roosevelt through Admiral Brownson is decidedly a different and much broader design. President Roosevelt has been consistent in advocating a large navy as the surest guarantee of peace between the United States and all foreign powers. Heretofore a large navy has been reckoned solely from the point of view of the number of ships, their tonnage, armor, guns and fighting capacity. With this ideal the American navy has grown steadily.

It is told of the late Chauncey Shaffer, who bears the same relation to New York "anecdote" that Snyder Smith does to London's, that he employed in his law office a stunted youth of very tractable temperament. One day Mr. Shaffer returned from luncheon in a lively mood and by token of the Maderia he had consumed, summoned Billy into his private office.

"Boy," he said carelessly, "go over to the Special Terms, and see what in h—l they're up to there."

The late Judge Brady was presiding over the trial of an action involving many interesting questions of substantive law. Hence, the courtroom was empty save for the litigants, the

To the somewhat uninteresting array of ships and tonnage the president proposes to give the world a somewhat startling demonstration of what the American navy is capable of doing to protect either or both extended shores of the United States. As Admiral Brownson said, "There is no time like the present for such a demonstration—a time when the United States is at perfect peace with every nation."

In everything that has come from the president regarding the movement it has been indicated that the fleet wherever it may go, is to be brought back to the Atlantic, and that the return is to be as great a demonstration of speed as the outward journey. While it is asserted that there is no foundation for apprehension of trouble in the immediate future between the United States and Japan, the proposed demonstration with the fleet can be looked upon in no other light than that the president intends to use the American navy for exactly the purpose for which he has advocated its augmentation—a guarantee of international peace.

It was stated here today that Ambassador O'Brien, who has been invited to Sagamore Hill the latter part of the week, will not be able to confer with the president before going to his new post at Tokio. The ambassador finds it necessary to devote some time to his personal affairs in Michigan, and will not find it convenient to return to the east before departing by way of San Francisco for Japan. It was remarked that there was no occasion for a conference between the president and Ambassador O'Brien other than the formality of official etiquette.

counsel and the necessary witnesses. Judge Brady's kindness toward women and children was proverbial, and when Billy stood against the railing of the inclosure, his face barely reaching over the balustrade, the judge noticed him immediately. He interrupted the argument of counsel and turned to Billy.

"Well, my lad," he said in a suave judicial accent, "what can I do for you?"

"I'm from Mr. Shaffer's office," Billy replied, "and he wants to know what in h—l you are doing over here."—Success.

A cracked mirror makes few friends

# LOT SALE

July 5th to 10th 1907

## VANOSS, IND. TER.

Our salesman will be on the townsite the above dates when we are going to have a SPECIAL SALE of town lots. This is our first attempt to sell VANOSS and if you want to get in on the GROUND FLOOR in a GOOD townsite be sure and attend this sale.

VANOSS is a RAILROAD townsite, being on the OLLAHOMA CENTRAL which is operating REGULAR trains through the town, and is located about half way between Ada and Stratford.

VANOSS is located in a FINE FARMING country, has an abundance of fine surface and running water.

VANOSS is noted for its fine building material, having the finest sand and gravel in the WORLD for the manufacture of concrete blocks.

The Oklahoma Central Railway Co. will make a rate of one fare plus 50 cents for the round trip. Tickets on sale from the 5th to the 10th, good for returning until July 11, 1907.

Be Sure and Attend This Sale

Remember the date

July 5th to 10th, 1907

For further particulars address

J. C. SPARGER, Mgr.,

Room 8, Oklahoma Central Offices,

Purcell, Ind. Ter.

The agricultural department predicts great destruction in the Southern cotton fields by the boll weevil this summer. This, in addition to the bad weather which necessitated so much replanting and caused so many cotton fields to be abandoned, will probably cut the crop so short as to insure high prices. The boll weevil has done some good as well as a deal of harm, for he has considerably helped along the agitation for diversified farming in Texas.—San Antonio Express.

In years to come the boll weevil will doubtless be recognized as a blessing in disguise.—Denison Herald.

#### TO PROSPECT COAL LANDS.

The Government Will Drill on Lands in Indian Territory.

Muskogee, I. T., July 7.—To ascertain the value of the segregated coal lands in Indian Territory the government will buy two diamond core drills and drill holes in the lands. This is to be done on the recommendation of J. George Wright, commissioner of the Five Tribes.

The drills will be purchased July 27, and the work commenced shortly after that date. The government will own the machinery which will be operated by men employed by the government. About sixty holes will be drilled and a record kept of the grade of ore found by the drillers. From this record a report will be made by Mr. Wright, on which congress will probably base future legislation relative to the coal lands.

Two years ago \$50,000 was appropriated by congress to ascertain the value of the lands in question. The lands were advertised for sale but all bids were rejected because they were below the appraised value. Four hundred and forty-five thousand acres of Indian lands have been set aside as segregated coal and mineral lands, and 110,000 additional have been leased. The government will not test the leased lands.

#### VIEWS AT THE HAGUE.

Regarded As Unfortunate That Japan and United States Disagree.

The Hague, July 7.—The general sentiment of the delegates to the peace conference regarding the question that has arisen between Japan and the United States is that the situation is unfortunate for both countries, as the original incident causing the disagreement is disproportionate to the grave results which may follow.

The question, the delegates think, is likely to create a hostile atmosphere, endangering their reciprocal commerce, to which the former friendly relations had opened the widest fields.

Although the sending of a fleet by the United States to the Pacific coast can not be interpreted as a threat, it is generally admitted here that such action may give rise to dangerous popular excitement which the administration at Washington may not be able to control.

The Spanish representatives say the United States has now found a hard nut to crack. The Russians say that the prediction of Witte that the next war would be between the United States and Japan is rapidly approaching realization. The English, French and Japanese delegations believe that both governments—at Washington and Tokio—sincerely wish to reach an understanding and will not be influenced by jingoism.

Some of the Germans here are of the opinion that the situation may lead to an American-German entente, which, while preventing the isolation of Germany, would be the strongest compact against British supremacy that could be made.

#### WAR NOT THOUGHT LIKELY.

Tension Between United States and Japan Arouses Wide Interest.

London, July 7.—The present tension between the United States and Japan is arousing the keenest interest among all the European diplomats. None of them, however, believe it will reach the state of war, because the heavy burden of debt Japan is carrying as a result of her failure to obtain indemnity from Russia forbids her embarking on a similarly costly enterprise in the next decade. It is recognized, nevertheless, that the United States is arousing the enmity of Japan, as one of her natural assets may have a handicap in the event of trouble with any other power.

Great Britain finds herself in an embarrassing position also, because she is obliged to stand between her colonies and the matter of anti-Japanese laws. The Transvaal has just put into operation a law regulating the entry of Asiatics and Chinese, and which compels them to submit to an examination and registry with thumb prints like criminals, which is exceedingly irritating to them. Australia threatens examination on the same lines. Alfred Deakin, the Australian premier, during his recent visit to

England repeatedly said in his speeches that the chief national question with which the Australian must deal was the menace of the inflow of Japanese labor.

#### MARRIAGE OF CENTENARIANS.

Groom 101 and Bride 100 Will Encounter Old Maids and Bachelors.

In East Tennessee August 26, John B. Brunden, aged 101 years, and Miss Rose McQuire, aged 100, will be married. To make the event one of lasting impressions invitations have been issued to none but "boys" and "girls" who have passed their ninetieth year. Among those who have been invited are two Iowa centenarians, Mrs. Mary Curtis, aged 101 years, of Farley, Ia., and Mrs. Morris, aged 100 years, of Des Moines, Ia.

Mrs. Mary Curtis was born in Tennessee January 29, 1806, during the second term of President Thomas Jefferson, the third president of the United States. She was scarcely more than a year old when Fulton perfected the steamboat, and as a child she heard her parents tell of the glorious deeds of George Washington. She remembers the war of 1812, and has vivid recollections of the visit of Lafayette of France to America. She was a matron of 40 years when the Mexican war broke out.

Mrs. Curtis' maiden name was Mary Carriger. Her father, a native of New York, settled at Blue Springs, N. C., where he died at the age of 94 years. Her mother, whose maiden name was Waggoner, lived to be nearly 115 years old. Mrs. Curtis has a brother, Tice Carriger, aged 104 years, who a year ago, was farming near Humboldt, Kansas, and another brother, Than Carriger, aged 9 years, also living in the state of Kansas. Of her own children there are living Mrs. Parm of Cookeville, Tenn., aged 75 years; Mrs. Angelina Scott of Dixon county, Tenn., aged 64 years; the baby of the family, with whom she resides at Farley, Ia.

Mrs. Farley does more work at 101 years of age than most women do at 80. She sews without glasses and threads her own needle. Her nature and remarkable mental powers are the wonder of all who meet her. She has been a life-long member of the Methodist church.

Nearly every man you meet boasts of having been raised on a farm, but not one of them would be willing to go back to it and perform the old tasks again.

### To Drill Three Holes.

It has developed that in all, three prospect holes are to be sunk on an east and west line by the oil company now here. These wells are to be three-fourth of a mile apart and to a depth of at least 2000 feet, provided gas or oil is not found at a lesser depth. Those who are promoting this drilling are very hopeful of valuable developments. The most successful fields in the southwest are on the same degree line as the Ada well, and something is expected to "bust" at an early date.

### Lanham Barbecue.

Taylor Lanham and E. L. Black of the Lanham precinct were visitors at The News office Monday. They were boosting the barbecue which will occur in that community on Thursday, the 18th inst. Delegate Carlton Weaver was honored with an invitation to address the people on that occasion in defense of the constitution. He accepts with pleasure. The gentlemen engaged in promoting the success of this barbecue know how to do things, and all may depend on a pleasant occasion.

### More Booze Suit Cases.

Deputy Brents seems to have an extra knack of smelling booze. He found two new suit cases in the Frisco depot Sunday and proceeded to make examination. In the two he found thirteen quarts of whisky and a feather pillow. Evidently the owner intended to drink it all and lay his weary head on his pillow and sleep it off. No one claims the property. The earth worms are celebrating today, no doubt, for the bottles were all broken.

### 25,000 Club Meeting.

There will be a meeting of the 25,000 club this, Monday evening, at the hall, for the purpose of determining the will of the membership in regard to naming an afternoon each week when the ladies shall have charge, and also an evening when the bachelors shall be hosts to the ladies. The full membership is urged to attend this meeting.

E. H. LUCAS,  
President.

### Died.

At the home of the parents on East 15th street, Saturday night at 10:00 o'clock, little George, the infant son of Mr. and Mrs. P. G. Ingram, passed away. The funeral services were conducted at the home Sunday afternoon at 4 o'clock, and the remains were put away at Rosedale an hour later. The bereaved parents have our most profound sympathy.

### Edwin Guinn Returns.

Edwin Guinn, of the firm of Guinn, & Mays, returned Sunday from a ten days' visit with home folks in McKenzie, Tenn. He reports that he had a splendid stay with the family, but he does not seem to have the "blues" because he returned.

### Drilling Stopped.

Drilling on the oil and gas well is temporarily suspended on account of shortage in casing. The casing became so serious that a considerable lot of casing must be utilized before drilling can be resumed. The casing will reach here about Wednesday.

### Card of Thanks.

We desire to express our appreciation of the assistance and sympathies so willingly extended during the sad affliction of our little son.

### BAILEY ACQUITTED.

The Man Who Killed Tom Carroll Is Freed Carroll and Finley Held.

On hearing of the killing at Sulphur Friday evening Deputy Brents went to the scene and returned with Deputy Bailey who fired the fatal shot, and Joe Carroll and L. V. Finley, who were with Tom Carroll when he fell. They were brought before Judge Winn Saturday and Bailey was acquitted. Both Carroll and Finley were held in default of bail for \$2000 each. The evidence showed that Bailey shot and killed Tom Carroll while the latter was resisting arrest. Also that Joe Carroll, a brother of the dead man, and L. V. Finley were also resisting arrest at the same time, and that each was armed when Deputy Bailey entered the door. It seems that Bailey had attempted to arrest Carroll at another joint, but as he was unarmed, Carroll backed him off. Bailey later armed himself and approached the rear door of Carroll's own place, when Carroll and his brother and Finley opened fire on the officer. The end proved fatal for Tom Carroll. Bailey used a double-barreled shotgun and Carroll's head was blown off. Carroll and Finley were taken to the Ardmore jail.

Enamelled Tea Kettles and preserving Kettles are the best and cheapest in the end. They wear longer and are the only perfect vessels for cooking purposes.

Preserving Kettles—3 quart 15c, 4 quart 20c, 6 quart 30c; 8 quart 35c; 10 quart 50c.

Water Buckets—10 quart 65c values, each 50c.

Pudding Pans—1 and 2 quart, 10c, 3 and 4 quart 15c, 8 quart 25c.

Dish Pans—12 quart 34c, 14 quart 45c.

Milk Pans—2 quart 10c, 4 quart 15c, 6 quart 20c.

We sell everything in Queensware, Glassware, Tinware, Woodenware, etc.

Fruit Jars—Jelly Glasses, Jar Caps, Jar Rubbers, and the prices right.

We have hundreds of useful items you can buy at 5c and 10c. You have often paid twice the money for the same grade of goods.

What 3c Will Buy Saturday Next.

500 milk crocks, regular one-gallon size. (No more than five to a customer.) Just think, each, Saturday .....3c

We are trying to save you money

### WOULD DRAW ON NEIGHBORS.

Murray County Not Satisfied—Would Take Other Townships.

Guthrie, Okla., July 8.—President Murray's committee to hear complaint regarding the constitution held one session yesterday, receiving a committee from Davis, I. T. which asked for more territory for Murray county, in which the town is situated. The committee was W. A. Lewis, D. P. Ellis, Charles Hutchins, J. D. Vaughan, T. B. Harvell and S. W. Ingalls. Mr. Harvell is president of a bank in Davis and of a like institution in Wynne-wood. A formal application was made for two additional townships on the western side, which would necessitate the reducing of the area of Garvin county (Pauls Valley). A statement prepared by the committee showed Murray to be the smallest county in the new state, and having approximately only 5 1-2 townships suitable for agricultural lands.

The effort to gain other townships for Murray county is not confined to the west border of that county. Carlton Weaver, delegate from Pontotoc county, is in receipt of an unsigned letter stating that petitions were being circulated in the Roff and Fitzhugh townships asking the convention to add that territory to Murray county, these efforts being inspired by people at Sulphur. The letter warns Weaver to be on the alert, that Murray county was after more territory, and counted on taking two townships from Pontotoc county.

The convention committee ruled it only had authority to hear complaints on the legislative apportionment, hence could give the Davis application no official consideration. It will probably be formally presented to the convention when it meets Wednesday. As yet only one matter of the apportionment has been presented, that being by Delegate Helton, who asked additional representation for Logan county.

A number of committees are at work considering probable changes in the constitution and election ordinance, which, the indications are, will be few in number. President Murray said today that most of them could be made without rewriting many pages of the constitution, and unless the present program is abandoned the convention will be in session but a few days. W. A. Ledbetter of Ardmore, a member of the advisory committee, will arrive tomorrow.

### YOU EAT TOO MUCH.

Try Two Meals a Day in Hot Weather and See How It Goes.

A learned English physician, Sir James Crichton-Browne, comes forward to tell us that we eat too much. But we know that already. Your own stomach has told you that many times already. Yet you have gone on heedlessly, just as though you were put here to live to eat, rather than to eat to live.

Eating is largely a matter of habit, almost as much a habit as drinking whisky, smoking a pipe or sleeping ten hours a day. Neither whisky or tobacco is necessary to the well-being of man; neither is ten hours of sleep. No more are three meals a day, especially in hot weather.

Is it any wonder that you fret and fume and grumble at the heat when the mercury gets up into the nineties, when you go around with your stomach distended with a lot of unnecessary food? What good does it do you to fill yourself up on beefsteak, potatoes, pie and pudding and go around sweating like a carthorse, when you could get along with one-half or one-third the food which you crowd into your stomach on a hot day?

Yes, what good does it do you? The human stomach has been compared to a furnace, which burns up food as a locomotive burns up coal. The careful fireman never overloads his engine, though his tender may be heaped and running over with coal, but you overload your stomach simply because there is an abundance of food on the table.

The result is that you are dull and stupid afterward, and are compelled to slow down in your work, just as an engine would do were it choked with coal until there were no draft to consume it.

You think you are generating energy when you are only inviting discomfort.

Try two meals a day for you.

It can not possibly hurt you. You may lose a little avaricious at first, but you will experience a joy in living such as you never dreamed of before.

Give your poor old tired stomach a rest. Send your liver on a vacation instead of prodding it with calomel to make it work overtime. Eat less. Walk more. Take hot baths often, no matter if the mercury is 100 in the shade. Curb your appetite. Don't worry. Keep away from the thermometer. Do not read the reports of "heat in other cities." Keep your blood cool by these means, and next fall you will say to yourself that the summer of 1907 was the pleasantest on record.—Oklahoma City News.

### Noah Gave Out Rain Checks.

Deacon Jones addressed the congregation.

Said, "The roof lets in the rain, and folks, that am an aggravation To Reverend Jackson Smith, that's plain;

Now, I propose, good sisters and brothers, We raise some funds to shingle up the leak.

A ball game we could play, On Independence Day."

But Sister Jones in loud tones then did speak: "That am no game for good church folks to play."

Deacon Jones replied, "Does not the good book say?"

### CHORUS.

"That Eve stole first and Adam stole second;

St. Peter umpired the game; Rebecca went to the well with a pitcher,

And Ruth in the field won fame; Goliath was struck out by David;

A base hit made on Abel by Cain; The prodigal son one home run made,

That Brother Noah gave out checks for rain?"

—Arthur Longbrake.

# CLEANSING the LEPERS

When through the strange providences of war the United States became obligated for the protection and education of the Filipinos, and the development of the resources of the islands of the Philippine archipelago, officials of the government were shocked and appalled not only by the numerous cases of leprosy, but by the careless indifference with which the disease was considered and the small effort which was made to prevent the spread of the dread scourge and to isolate those afflicted. But immediately upon taking command in the islands the United States began to consider the matter, and has developed a policy which is being carried out systematically not only for the comfort of the 5,000 known lepers in the islands, but for the protection of others against the disease. As we have said, the authorities were amazed when they came to look into the situation to find so many afflicted with this dread disease, but, beginning with the army surgeons who first took up the work of segregation, the task of caring for the patients and protecting the rest of the community from the disease has gone on assiduously until the experts now hold out the gratifying promise that leprosy may be finally eradicated from the Philippine islands.

Those who have looked into the history of the treatment of leprosy find that while attention has been given for many years to lepers, the work has been mainly of a charitable nature and was not carried on systematically.

A Leper Ward in the Cullen Hospital.

ically or in such a way as to control the situation. The help and treatment were largely given to those people who could not take care of themselves or who had no friends to provide for them. There were many lepers who could not become public charges, and they were allowed to live as they pleased, and in this way the disease spread. It was not until the last year or two that it was possible to provide complete isolation.

This step was taken by the construction, on the island of Cullen, of a leper colony, where there are at present accommodations for 800 patients, nearly all of whom are on hand. The estimate for taking care ultimately of the 4,000 or 5,000 lepers on the island gave the cost of subsistence, material for houses, clothing, transportation, etc., to maintain them all as about 25 cents a day for each person. It is possible that the estimated number of lepers is somewhat exaggerated, because when the doctors came to examine those who had been suspected of leprosy they found that many of them were not so afflicted. If the same proportion is maintained throughout the examination, of course, the estimated total will be materially reduced.

There are many problems connected with the caring for the lepers in the Philippines. One of these is their employment. While only a small proportion of the patients are capable, from the nature of their disease, of performing manual labor, many of them might engage in the lighter occupations in the manufacture of articles which could be sold; but there is prejudice, natural enough under the circumstances, against purchasing or possessing articles handled by lepers, and this prejudice is not removed by the fact that the experts pronounce the danger of contamination removed by the process of sterilization. One proposition is to raise cattle, involving a light occupation in which many of the lepers might engage. It is believed there would be no objection on the part of the public to buy

## NEEDED WHOLE BOOKCASE.

Why One Man Is Dissatisfied with His Encyclopedia.

Just as the train was pulling out of the station a breathless commuter swung himself upon the platform of the last car at a station some 30 minutes from New York. He carried a green cloth bag, such as are affected by young lawyers, and one large volume of an encyclopedia was under his arm.

He sank into a seat and, with a deep sigh, opened the book. He lost no time in finding his place, but he seemed far from satisfied. Soon he turned in great exasperation to his neighbor and remarked:

"Now, wouldn't that jar you? I've been paying for this encyclopedia for the last two years, and never had occasion to use it before. A new client, a big tanner, is going to call on me this morning, and I wanted to read up on the subject of tanning before I reached the city. So I snatched the volume with the letter T while eating breakfast, and incidentally ran five blocks to catch my train. Look for the word 'Tanning'—there it is. But that is all that is there. Just take a look at that!" he exclaimed, pointing to this simple legend:

"Tanning—see leather." — Judge's Library.

**Copper Mining Good Trade.**  
Contrary to general belief, copper mining is healthy work, and the average of life here reaches 80 years, for the composition of the ore has an extremely strengthening effect on the

## WHEN A QUEEN BATHES.

Spanish Royalty in Seclusion Starts with the Sea Waves.

The fashionable bathing resort of Spain is in San Sebastian. But do women in that well-nigh tropical climate wear startling costumes? By no means. Their garb is as staid as that worn on the English coasts; very charming, and becoming, but without reserved and dignified. The material is apt to be dark blue serge trimmed with white braid or crimson serge. At Trouville, in France, the bathers are not rarely annoyed—or not annoyed?—by the leveling of opera glasses, which practice is rigorously forbidden in the Spanish resort. This prohibition is partly explained by the frequent presence of the queen mother, and also the young queen, who, of course, are left perfectly unmolested. Their bathing box is very picturesque. It is built in the Moorish style, with minarets on either side, and the dome in the middle surmounted by the royal crown in gold. When in use, it is slowly rolled down to sea, and royalty can bathe in perfect privacy, though the "box" is not inclosed.

**Roses in Legend and History.**  
When the captive Jews in Babylon hung their harps upon the willows, the air was sweet with the fragrance of growing roses; and upon returning to their own land the exiles are said to have carried with them seeds of the flowers which had brightened their captivity. Thus Syria became the home of roses. Even the name of this

## HEAD OF KNIGHTS TEMPLAR OF AMERICA

Col. George M. Moulton.

The triennial convocation of the Knights Templar is to be held at Saratoga, N. Y., July 8 to 12. Col. George M. Moulton of Chicago, Grand Master of the Knights Templar of America, will preside at the meetings.

blood and nerves. Few copper miners die before they reach the age of 83 or 84. But on the other hand the copper smelter is lucky if he sees 50.

Whiskey is bad to drink, but its distilling is health giving, and a fatal foe to disease germs of nearly every kind. Distillery workers show the excellent average of 81 years of life and seldom suffer from illness unless given to intemperance.

Oddly enough, barring accidents, there would be no trade to beat the steeplejacks for keeping life going. The task of working at great heights from the ground keeps the nervous system in perfect order, and that is two-thirds of the battle. Steeplejacks who are not killed by accident show the magnificent average of 89 years.

**Metals and Metaphors.**  
"It is most amazing," said a metallurgist, "how the world relies on metals for its metaphors and similes. Thus an orator is silver-tongued or golden-mouthed. An explorer is bronzed by African suns. A resolute chap has an iron will. A sluggish moves with leaden feet. An ostrich has a copper-lined stomach. A millionaire has tin. A swindler is as slippery as quicksilver. A borrower has brass."

country is derived, according to some philologists, from "Seri," meaning "a wild rose." In the Sanskrit, the oldest of Hindu myths declares that Vishnu found his wife in the heart of a rose. Since the day of Vishnu, many another has found his wife, if not in the heart of a rose, by means of a rose. "My love I speak in flowers," and the rosebud has been especially intrusted with the lover's message.—From "Legends of the Roses," by Mrs. A. S. Hardy, in the Circle.

**Pennsylvania's Disappearing Timber.**  
An idea of the rapidity with which the timber is disappearing from some sections of Pennsylvania can be obtained from the following figures, which refer to the timber cutting on the Hicks Run tract, in Clearfield county: Original size of tract, 9,000 acres; timber cut the first two years, 3,000 acres; still standing, 6,000 acres; amount of timber cut, 50,000,000 feet; amount standing, 200,000,000 feet; daily capacity of sawmill, 200,000 feet; daily shipments, 15 carloads; amount of timber in Hicks Run yard, 6,000,000 feet; time of operation, two years; estimated time to cut standing timber, four years; number of men employed, 800 to 1,000.

## ROMAN CATHOLIC CATHEDRAL AT ST. PAUL

The corner stone of this magnificent structure, which, when completed, will have cost over \$3,000,000, was laid recently. Archbishop Ireland made the address. President Roosevelt sent his congratulations.

## FINANCIER RETIRES WITH "COMPETENCE"

Thomas F. Ryan.

Thomas F. Ryan has ended his days of activity in Wall street. His departure for Europe signalized his breaking away from the personal management of the gigantic corporations with which he has been associated for the last twenty-five years. The great financier is said to have gradually disposed of his enormous railroad and corporation interests and, with a fortune of more than \$100,000,000, plans to live quietly on his Virginia estate. It is whispered he is ambitious to be United States senator from that state.

## PUCK'S SCHOOL OF CRIME.

Chance for All Who Would Graduate from Home to Penitentiary.

Why work honestly on a small salary when we can show you by mail how to double your income without interfering (at first) with your present employment?

Anyone will tell you that there is more money in raising currency than in raising mushrooms.

Learn to be a pickpocket. Some pickpockets make more money than schoolteachers. We will teach wives to pick their husband's pockets, and husbands to pick other people's pockets. Pickpocketing is a light genteel profession, and if you have the ability there is no limit to what you can make or the prominence you may attain as a pickpocket.

Three of our students are now in the house of representatives, four are successful lawyers, another is a wealthy judge, and so on. This course includes nine promoting and industrial insurance.

If you are earning less than \$50,000 a year we can help you.

Classes forming. Don't delay. Begin now. Address Puck's School of Crime, New York.—Puck.

**Deceptive Mirror.**  
One's reflection in a mirror never does one justice. Comfortable thought for the plain and pretty alike! Complexion, expression and color are all really better than the shining glass makes them appear. Let not her to

## CORNER STONE OF EMPIRE.

Horse Has at All Times Been Potent Factor in War.

From the earliest times the horse has been a potent factor in war, and to-day his education is a delicate and serious matter, undertaken at great expense by all the nations of the world. Germany needs a million horses for cavalry and artillery to put her colossal forces in the field; France requires probably three-quarters of a million; and even Great Britain has needed as many as 230,000—in her serious predicament in South Africa while she was fighting the Boers.

Although England in peace time mounts only two-thirds of her cavalry, her horse bill amounts to about \$400,000 a year—a figure which may be multiplied by four or five for the German army. In most countries omnibus, farm and domestic horses are registered as being available in time of war for miscellaneous service, and for this anything from \$30,000 to \$150,000 a year may be paid by a military nation.

France spends upward of \$600,000 a year on horses for her great armies. As a general rule, the recruits are five years old and cost \$200 each.—From "The War Horse at School," by William C. Fitz-Gerald, in the Circle.

**Flew Too High at First.**  
The mistakes inexperienced music teachers make in mapping out courses of study for their pupils are almost

## PRINCE'S FIRST KNICKERBOCKERS

"While Spain was acclaiming the birth of an heir to the throne another future sovereign was going through one of the most momentous experiences of childhood," says L'Illustration. "The young Czarovitch Alexis, who will be three years old on July 30, attained to the dignity of trousers. What a proud occasion for a small boy! One might say of the Czarovitch that on the day his parents granted him this privilege of manhood he was as happy as a prince, but judging from the photograph he seems to have been just as happy as an ordinary little boy."

whom nature has been sparing of her charms despair.

If she would see herself in the deceptive mirror as others see her with the eye, or as nearly as possible, let her hasten to a cooper's shop and buy a quantity of soft, pure white material—gauze, if possible; if not, Swiss or India muslin will answer very well.

Be sure to have it pure white, and after polishing the surface of the mirror gather the material at the center of the top and bring it down softly at either side, framing the glass in.

## Danger of Electric Light.

If your dwelling is electrically lighted never place food, clothes or other inflammable material against the wires, meters, or switches; never use an electric wire as a clothesline, and see to it that your dwelling is kept free from rats, as these pests often gnaw the insulation from the wires. The amount of loss from "electric fires" in the United States in one year, according to the Saturday Evening Post, is \$15,000,000.

## How to Protect Seeds.

All seeds that rats, mice or birds esteem can be effectually protected by coating them with red lead.

Place the seed in a vessel considerably larger than is needed to contain it, add to it a few drops of paraffin or water, just enough (not more) to moisten every seed, and stir it well; then add a small quantity of red lead and stir again until each seed is thoroughly coated and separate. Vermin will sometimes attack seeds thus treated, but disgusted with the result soon pass on to other fare.—The Gardener.
